VS3 Power Wall Cleaning System™

VS3 Sanitizing Machine Power Wall Cleaning System™

VS3

Model Specifications

Shipping Weight	25 lbs., 4 oz.
Net Weight	20 pounds.
Construction	Thermoformed ABS uni-body with built-in 2-gallon detergent reservoir and 2 glider storage wells. Separate detergent reservoir cover.
Detergent Pump	Non-metallic of high temperature chemically compatible plastic material; high pressure performance; low amperage draw. UL listed motor—115V or 240V, 50/60 cycle, thermally protected.
Wattage	35 watts.
Easy Filling	Large opening to 2-gallon solution reservoir.
Quick Connect Fittings	Machine has quick connect fittings for attaching and detaching cleaning glider.
"Quick-Change" Cleaning Pads	Specially designed heavy cotton towel/pad is reversible, easily attaches to velcro strips on glider.
Glider Hose	Specially compounded Neoprene tubing. Made to withstand effects of constant contact with detergent chemicals and resist effects of aging.
Glider	Fabricated from aluminum, stainless steel, brass and neoprene to resist rusting and corrosion.
Detergent Required	Von Schrader wall detergent or equal product, with same protective film forming and sanitizing properties. Three to five ounces of detergent make 2 gallons of solution—enough for an entire day's cleaning at a cost of less than 50¢.

Cleaning high walls is now faster & easier. New optional Pole Packages available. No ladders, stools or scaffolding required; clean safely from the floor.

#W852 standard high-reach pole package for cleaning up to 12' high.

#W853 maxi-reach pole package for cleaning up to 18' high.

“sponge and bucket” method!

Effectively cleans all washable walls and ceilings *4 times faster* than conventional

The Von Schrader VS3 Sanitizing Machine cleans walls and ceilings of all types: painted, marble, ceramic tile, washable wallpaper, cinder block, rough cement block, Spanish plaster, swirl plaster and rough painted brick. And the Von Schrader system is so mild it not only leaves the wall clean and sparkling, but allows painted walls to retain their original beauty for years longer, thereby eliminating frequent and costly repainting.

Economical

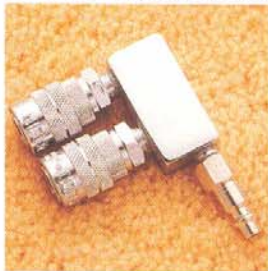

This inexpensive VS3 Sanitizing Machine, weighing only 20 pounds, cleans walls and ceilings 4 times faster than by hand . . . with material costs of less than 50¢ per day. The VS3 cleans one-third faster than other machines . . . because there are only two instead of three operations. The special Von Schrader detergent eliminates the rinsing operation. And because of this, labor costs are cut by one-third, and the amount of wall area that can be cleaned in any given length of time is one-third greater. No costly or experienced operator is necessary. Your most inexperienced help can learn to do a perfect, streakless job in a matter of minutes. There is nothing to disrupt since no drop cloths are needed. And when heavy and continuous wall washing is planned, a special attachment is available so that two, or even four people can work from one machine—thereby doubling or quadrupling the amount of walls cleaned in any given length of time.

Operation is Simple

The cleaning solution is pumped electrically through 25 feet of tubing to the washing glider where the flow of solution is controlled by a unique push button on the handle. As the operator moves the glider across the wall in an easy, smooth, stroking motion, a thin film of cleansing solution is deposited which loosens the dirt. Then following along with a buffing glider, the surface is cleaned and dried. The result is a perfectly clean wall with no streak or overlap marks accomplished with a minimum of effort and a maximum of efficiency.

ALL VON SCHRADER MACHINES CARRY A SPECIAL 10-3-1 YEAR WARRANTY.

OPTIONAL ACCESSORIES

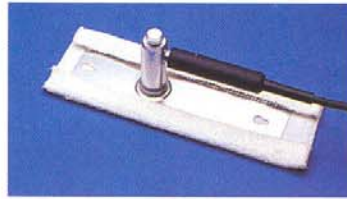

Adapter

This device permits the use of two cleaning gliders simultaneously with one machine. With adapter and additional gliders, two or four people can clean walls using only one machine.

The right glider for every job.

Now . . . with even more speed, options and convenience!

New! “Quick Change” Cleaning Pads

Heavy cotton towel/pads attach to glider with velcro strips for quick, easy change, thorough cleaning.

New! “Quick-Fit” Heavy-Duty Scrubber Pads

Instantly attach to the light-weight glider. A touch of the push button control saturates the scrubber pad with wall/ceiling detergent. Stubborn scuffs and marks are gone, with virtually no effort! Medium and coarse pads available.

New! “Instant-Locking” Brush Attachment

Rugged, heavy-duty bristle brush attaches to glider base with a unique keyhole locking system, secured with 2 stainless steel twist knobs. Wall detergent sprays through the bristles with a touch of the push button control. It efficiently attacks dirty brick, stucco, cinder block, spanish plaster, and other rough-textured surfaces. Also very effective for cleaning fire-smoked walls, awnings and canopies.
